PRODUCT SPECIFICATIONS & TECHNICAL DATA

PETROFLO S.A.P. GEAR OIL 90

HIGH TECHNOLOGY:

PETROFLO ADVANCED SYNTHESIZED LUBRICANTS (S.A.P. GEAR OIL 90), meets or exceeds the standard of MIL-L1205E; MACK GO-H; CATERPILLAR GEAR OIL; API GL-4, GL-5 and PG-2; ROCKWELL R-170 HEAVY TRUCK AXLE REQUIREMENTS; G.E./WESTINGHOUSE GEAR BOXES; FULLER TRANSMISSIONS.

DESCRIPTION:

PETROFLO S.A.P. GEAR OIL 90 is a scientifically compounded synthesized gear lubricant. It will provide superior anti-friction, anti-wear and extreme pressure lubrication. It is made with carefully selected, and proven synthesized polymer to provide superior protection to gears and bearings, under the most adverse temperature conditions, and the hardest operating service.

BENEFITS:

- Extreme pressure agents;
- Long lubrication life;
- High thermal stability;
- Leak resistant;
- Anti-foam agents;
- Corrosion and rust inhibitors;
- High Timken OK Load;
- Cooler running gears;
- Protects gears when level of lubricant is low;
- Reduces fuel consumption;
- Super oil cling to metal gear surfaces;
- Protects gears against sudden shock loads.

APPLICATION:

PETROFLO S.A.P. GEAR OIL 90 is primarily for heavy duty enclosed gear operations found in transmission and rear end differential drives in trucking, construction, railroad cars, busing and other severe duty fleet operations. It also finds wide use in heavy duty industrial transmissions and gear trains subject to high impact loads.
